- Strong but soft jaws to protect your work
- Strong lightweight design makes it easy to clamp and hold your work
- Easy tool-less conversion for spreading
- High quality steel bar
- Up to 3.5kn 1450g clamping force

**NEW
PRODUCT**

Soloclamp™

The new Cox Soloclamp Bar Clamp & Spreader provides users with an easy change mechanism to convert the clamp to a spreader. Soloclamp's fast, one-handed operation helps position the claw pads, providing better grip and protection of the clamped material. Releasing the clamping force is easy and safe with a one action release trigger built into the handle.

Easy-to-use

The pistol grip handle houses a ratchet clamping mechanism that incrementally applies force when the trigger is pulled. The Cox Soloclamp can be used as a bar clamp or as a spreader simply by turning the handle around.

Operation

One-Handed

Repeatedly squeeze the trigger until the jaws clamp on to the object being held.

Two-Handed (High Speed Operation)

Hold the handle in one hand and with the other push down on rod until contact is made with the object. Squeeze the trigger to exert desired clamping force.

Release of Clamping Force

To release or reposition the clamp jaw, squeeze the quick release trigger located in the handle. The clamping jaws are forced apart allowing the jaw to slide along the bar.

Configured as spreader

Acetal claw pads

SoloEasi-clamp

- General purpose clamp design
- Lightweight and easy-to-use
- Range starts at 12"

SoloPower-clamp

- More powerful general purpose clamp
- Range starts at 12"

SoloUltra-clamp

- Developed for heavy duty clamping applications
- Compact, unique and robust design
- Range starts at 6"
